For Immediate Release

Available Now: FIBERrific™ +omega-3

Now available for sale, the first all-in-one, shelf-stable prebiotic and omega-3 in a natural fiber base (instant inulin). Pure-le Natural FIBERrific™ +omega-3 is a pure, natural 97% fiber with omega-3 (DHA and EPA) in one easy to take supplement.

Each teaspoon of FIBERrific™ +omega-3 contains 2.5g of natural fiber and over 100mg of omega-3 (DHA and EPA). FIBERrific™ +omega-3 can help improve visual acuity and enhances the absorption of Calcium, Iron, Magnesium and Zinc. It also helps to reduce the risk of coronary heart disease and lower unhealthy cholesterol. Additionally, the omega-3 (DHA and EPA) provides the perfect brain food to improve brain development and memory functions, from conception through old age.

Pure-le Natural FIBERrific™ +omega-3 is natural, gluten-free and shelf stable. It contains the highest quality, ultra filtered and molecularly distilled pure DHA and EPA. Put it in citrus juices or citrus drinks to create DHA and EPA and Fiber rich drinks, shakes and smoothies.

FIBERrific™ +omega-3 contains the highest grade, biologically active forms of Omega-3, DHA and EPA. Any other sources of omega-3 would not be potent enough to carry the FIBERrific™ name. We strive to keep the tradition of being potent and pure for the benefit of our clients and their customers.

FIBERrific™ +omega-3 dissolves completely in any liquid or soft food. There is low taste, no texture and never thickens.

Take FIBERrific™ +omega-3 twice daily to give your body the essential nutrients it and your individual body systems require to operate effectively and to keep you healthy. A breath taking marketing campaign is in place to support this product, including samples, full line brochure and product information. FIBERrific™ +omega-3 is available at better health retailers.
